REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: Claims 1-6, 8-12, 14 and 51-57 are allowable because none of the prior art of record suggests at least the light source, which is a light emitter, being arranged in close contact with the top of the truncated pyramid, the top smaller than the base, the top being an outermost peripheral planar surface, the light guide plate being arranged in close contact with the base of the truncated pyramid. The prior art to IKEDA et al (JP 07-095360) is disclosed with the light emitter portion 82 in figure 20 on top of circuit substrate 81, insertion hole 46 on each top of the truncated pyramid in figure 19 which receives the light emitter portion within the hole 46, positioning the substrate 81 in close contact with the top of the pyramid, and the hole 46 at the top of the pyramid does not suggest the claimed outermost peripheral planar surface which is in close contact with the light source which is a light emitter, so that light is propagated from a light emitting part of the light source to the light guide plate without passing through any air layer.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Alan Cariaso whose telephone number is (571) 272-2366. The examiner can normally be reached on 9-5:30 M-F.
